		K	1	2	3	4	5	6	7	8	Module 1 Operations and Linear Functions & Inequalities	Module 2 Linear Functions and Data Organizations	Module 1 Numbers Systems and Data Analysis	Module 2 Non-Linear Expressions and Equations	Module 1 Geometric Properties and Relations	Module 2 Geometrical Reasoning
Measurement, Data, and Probability: Units and Tools of Measurement																
CC.2.4.K.A.1	Describe and compare attributes of length, area, weight, and capacity of everyday objects.	●														
CC.2.4.1.A.1	Order lengths and measure them both indirectly and by repeating length units.		●													
CC.2.4.1.A.2	Tell and write time to the nearest half hour using both analog and digital clocks.			●												
CC.2.4.2.A.1	Measure and estimate lengths in standard units using appropriate tools.			●												
CC.2.4.2.A.2	Tell and write time to the nearest five minutes using both analog and digital clocks.				●											
M03-D-M.1.1.1	Tell, show, and/or write time (analog) to the nearest minute.				●											
M03-D-M.1.1.2	Calculate elapsed time to the minute in a given situation (total elapsed time limited to 60 minutes or less).				●											
M03-D-M.1.2.1	Measure and estimate liquid volumes and masses of objects using standard units (cups [c], pints [pt], quarts [qt], gallons [gal], ounces [oz.], and pounds [lb]) and metric units (liters [l], grams [g], and kilograms [kg]).				●											
M03-D-M.1.2.3	Use a ruler to measure lengths to the nearest quarter inch or centimeter.				●											
M03-D-M.1.3.1	Compare total values of combinations of coins (penny, nickel, dime, and quarter) and/or dollar bills less than \$5.00.				●											
M03-D-M.1.3.3	Round amounts of money to the nearest dollar.				●											
M04-D-M.1.1.1	Know relative sizes of measurement units within one system of units including standard units (in., ft, yd, mi; oz., lb; and c, pt, qt, gal), metric units (cm, m, km; g, kg; and mL, L), and time (sec, min, hr, day, wk, mo, and yr). Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. A table of equivalencies will be provided.					●										
M04-D-M.1.1.4	Identify time (analog or digital) as the amount of minutes before or after the hour.															
M04-D-M.3.1.1	Measure angles in whole-number degrees using a protractor. With the aid of a protractor, sketch angles of a specified measure.															
M05-D-M.1.1.1	Convert between different-sized measurement units within a given measurement system. A table of equivalencies will be provided.							●								
Measurement, Data, and Probability: Measurement Applications																
CC.2.4.2.A.3	Solve problems and make change using coins and paper currency with appropriate symbols.				●											
CC.2.4.2.A.6	Extend the concepts of addition and subtraction to problems involving length.				●											
M03-D-M.1.2.2	Add, subtract, multiply, and divide to solve one-step word problems involving masses or liquid volumes that are given in the same units.				●											
M03-D-M.1.3.2	Make change for an amount up to \$5.00 with no more than \$2.00 change given (penny, nickel, dime, quarter, and dollar).				●											
M03-D-M.3.1.1	Measure areas by counting unit squares (square cm, square m, square in., square ft, and non-standard square units).				●											
M03-D-M.3.1.2	Multiply side lengths to find areas of rectangles with whole-number side lengths in the context of solving real-world and mathematical problems, and represent whole-number products as rectangular areas in mathematical reasoning.				●											
M03-D-M.4.1.1	Solve real-world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side length, exhibiting rectangles with the same perimeter and different areas, and exhibiting rectangles with the same area and different perimeters. Use the same units throughout the problem.				●											
M04-D-M.3.1.2	Solve addition and subtraction problems to find unknown angles on a diagram in real-world and mathematical problems. (Angles must be adjacent and non-overlapping.)															
M04-D-M.1.1.2	Use the four operations to solve word problems involving distances, intervals of time (such as elapsed time), liquid volumes, masses of objects; money, including problems involving simple fractions or decimals; and problems that require expressing measurements given in a larger unit in terms of a smaller unit.							●								
M04-D-M.1.1.3	Apply the area and perimeter formulas for rectangles in real-world and mathematical problems (may include finding a missing side length). Whole numbers only. The formulas will be provided.							●								
M05-D-M.3.1.1	Apply the formulas $V = l \times w \times h$ and $V = B \times h$ for rectangular prisms to find volumes of right rectangular prisms with whole-number edge lengths in the context of solving real-world and mathematical problems. Formulas will be provided.								●							
M05-D-M.3.1.2	Find volumes of solid figures composed of two non-overlapping right rectangular prisms.								●							
Measurement, Data, and Probability: Data Displays
