Content Code	Eligible Content	Grades								Algebra I		Algebra II		Geometry		
		K	1	2	3	4	5	6	7	8	Module 1 Operations and Linear Functions & Inequalities	Module 2 Linear Functions and Data Organizations	Module 1 Numbers Systems and Data Analysis	Module 2 Non-Linear Expressions and Equations	Module 1 Geometric Properties and Relations	Module 2 Geometrical Reasoning
Numbers and Operations: Number Sense																
M03.A-T.1.1.1	Round two- and three-digit whole numbers to the nearest ten or hundred, respectively.				●											
M03.A-T.1.1.4	Order a set of whole numbers from least to greatest or greatest to least (up through 9,999, and limit sets to no more than four numbers).				●											
M03.A-F.1.1.5	Compare two fractions with the same denominator (limit denominators to 1, 2, 3, 4, 6, and 8), using the symbols $>$, $=$, or $<$, and/or justify the conclusions.				●											
M04.A-T.1.1.4	Round multi-digit whole numbers (through 1,000,000) to any place.															
M04.A-T.1.1.1	Demonstrate an understanding that in a multi-digit whole number (through 1,000,000), a digit in one place represents ten times what it represents in the place to its right.					●										
M04.A-T.1.1.3	Compare two multi-digit numbers through 1,000,000 based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols.															
M04.A-F.1.1.2	Compare two fractions with different numerators and different denominators (denominators limited to 2, 3, 4, 5, 6, 8, 10, 12, and 100) using the symbols $>$, $=$, or $<$ and justify the conclusions.					●										
M04.A-F.3.1.3	Compare two decimals to hundredths using the symbols $>$, $=$, or $<$, and justify the conclusions.					●										

Content Code	Eligible Content		
Algebraic Concepts: Functional Representations			
M03.B-O.3.1.5	Identify arithmetic patterns (including patterns in the addition table or multiplication table) and/or explain them using properties of operations.		
M04.B-O.3.1.1	Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself.		
M04.B-O.3.1.2	Determine the missing elements in a function table (limit to $+$, $-$, or \times and to whole numbers or money).		
M04.B-O.3.1.3	Determine the rule for a function given a table (limit to $+$, $-$, or \times and to whole numbers).		
M05.B-O.2.1.1	Generate two numerical patterns using two given rules.		
M05.B-O.2.1.2	Identify apparent relationships between corresponding terms of two patterns with the same starting numbers that follow different rules.		
M06.B-E.3.1.2	Analyze the relationship between the dependent and independent variables using graphs and tables and/or relate these to an equation.		
M08.B-E.2.1.1	Graph proportional relationships, interpreting the unit rate as the slope of the graph. Compare two different proportional relationships represented in different ways.		

When students are expected to demonstrate the knowledge, skills, and abilities described by an eligible content—**No VMC is currently available.**

When students are expected to demonstrate the knowledge, skills, and abilities described by an eligible content—**VMC is currently available.**

Draft 8/07/2013

M04.B-O.1.1.3	Solve multi-step word problems posed with whole numbers using the four operations. Answers will be either whole numbers or have remainders that must be interpreted yielding a final answer that is a whole number. Represent these problems using equations with a symbol or letter standing for the unknown quantity.		
M04.B-O.1.1.4	Identify the missing symbol (+, −, ×, ÷, =, <, and >) that makes a number sentence true (single-digit divisor only).		
M06.B-E.2.1.1	Use substitution to determine whether a given number in a specified set makes an equation or inequality true.		
M06.B-E.2.1.3	Solve real-world and mathematical problems by writing and solving equations of the form $x + p = q$ and $px = q$ for cases in which p , q , and x are all non-negative rational numbers.		
M06.B-E.2.1.4	Write an inequality of the form $x > c$ or $x < c$ to represent a constraint or condition in a real-world or mathematical problem and/or represent solutions of such inequalities on a number line.		
M06.B-E.3.1.1	Write an equation to express the relationship between the dependent and independent variables.		
M07.B-E.2.2.1	Solve word problems leading to equations of the form $px + q = r$ and $p(x + q) = r$, where p , q , and r are specific rational numbers.		
M07.B-E.2.2.2	Solve word problems leading to inequalities of the form $px + q > r$ or $px + q < r$, where p , q , and r are specific rational numbers, and graph the solution set of the inequality.		
M07.B-E.2.3.1	Determine the reasonableness of answer(s) or interpret the solution(s) in the context of the problem.		
A1.1.3.1.1	Write or solve compound inequalities and/or graph their solution sets on a number line (may include absolute value inequalities).		
A1.1.3.1.2	Identify or graph the solution set to a linear inequality on a number line.		
A1.1.3.1.3	Interpret solutions to problems in the context of the problem situation. Note: Linear inequalities only.		
M08.B-E.3.1.1	Write and identify linear equations in one variable with one solution, infinitely many solutions, or no solutions. Show which of these possibilities is the case by successively transforming the given equation into simpler forms until an equivalent equation of the form $x = a$, $a = a$, or $a = b$ results (where a and b are different numbers).		
M08.B-E.3.1.2	Solve linear equations that have rational number coefficients, including equations whose solutions require expanding expressions using the distributive property and collecting like terms.		
A2.1.3.2.2	Use algebraic processes to solve a formula for a given variable (e.g., solve $d = rt$ for r).		
A1.1.2.1.1	Write, solve, and/or apply a linear equation (including problem situations).		

A1.1.2.1.3	Interpret solutions to problems in the context of the problem situation. Note: Linear equations only.		
M08.B-E.3.1.3	Interpret solutions to a system of two linear equations in two variables as points of intersection of their graphs because points of intersection satisfy both equations simultaneously.		
M08.B-E.3.1.4	Solve systems of two linear equations in two variables algebraically and estimate solutions by graphing the equations. Solve simple cases by inspection.		
A1.1.2.2.1	Write and/or solve a system of linear equations (including problem situations) using graphing, substitution, and/or elimination. Note: Limit systems to two linear equations.		
M08.B-E.3.1.5	Solve real-world and mathematical problems leading to two linear equations in two variables.		
A1.1.2.2.2	Interpret solutions to problems in the context of the problem situation. Note: Limit systems to two linear equations.		
A1.1.3.2.1	Write and/or solve a system of linear inequalities using graphing. Note: Limit systems to two linear inequalities.		
A1.1.3.2.2	Interpret solutions to problems in the context of the problem situation. Note: Limit systems to two linear inequalities.		
A2.1.3.1.1	Write and/or solve quadratic equations (including factoring and using the Quadratic Formula).		
A2.1.3.1.2	Solve equations involving rational and/or radical expressions (e.g., $10/(x + 3) + 12/(x - 2) = 1$ or $\sqrt{x^2 + 21x} = 14$).		
A2.1.3.1.3	Write and/or solve a simple exponential or logarithmic equation (including common and natural logarithms).		
A2.1.3.1.4	Write, solve, and/or apply linear or exponential growth or decay (including problem situations).

		K	1	2	3	4	5	6	7	8	Module 1 Operations and Linear Functions & Inequalities	Module 2 Linear Functions and Data Organizations
Geometry: Geometrical Figures												
M03.C-G.1.1.1	Explain that shapes in different categories may share attributes and that the shared attributes can define a larger category.				●							
M03.C-G.1.1.2	Recognize rhombi, rectangles, and square as examples of quadrilaterals and/or draw examples of quadrilaterals that do not belong to any of these subcategories.				●							
M04.C-G.1.1.1	Draw points, lines, line segments, rays, angles (right, acute, and obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures.					●						
M04.C-G.1.1.2	Classify two-dimensional figures based on the presence or absence of parallel or perpendicular lines or the presence or absence of angles of a specified size. Recognize right triangles as a category, and identify right triangles.					●						
M04.C-G.1.1.3	Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded along the line into mirroring parts. Identify line-symmetric figures and draw lines of symmetry (up to two lines of symmetry).					●						
M05.C-G.2.1.1	Classify two-dimensional figures in a hierarchy based on properties.						●					
G.1.2.1.2	Identify and/or use properties of quadrilaterals.											
M06.C-G.1.1.5	Represent three-dimensional figures using nets made of rectangles and triangles.									●
